 Portfolio

 Location: Azam Town Karachi, Sindh, Pakistan

About: A dedicated Computer Science professional with over 1+ year of hands-on experience in Java and full-stack development. I have successfully collaborated with cross-functional teams to build robust software solutions using modern frameworks and tools. Passionate about technology and innovation, I am eager to contribute to forward-thinking projects while continuously enhancing my skills and driving impactful advancements.

Technical Skills

Programming Languages: Java, TypeScript, JavaScript, SQL, HTML5, CSS3.

Frameworks & Libraries:

- *Backend:* Spring Boot Spring MVC, Spring Security, Spring Data JPA, Spring ORM, Hibernate.
- *Frontend:* Angular (Material), Bootstrap 5, Tailwind CSS.

Development Tools: IntelliJ IDEA, VS Code, Postman, Git/GitHub, MySQL Workbench, Eclipse, NetBeans, XAMPP, SOAP UI.

APIs & Protocols: RESTful API development, SOAP Web Services, SMTP.

Methodologies: Object-Oriented Programming (OOP), MVC Architecture, JWT Authentication.

Experience

Java Developer

at Avrio Global

June 2024 – Present

Karachi, Sindh

- **Vendor at EFU Life Assurance:**

- * Contribute in the New Business Department and Group Benefits Department.

- **Responsibilities:**

- * Develop, test, and maintain high-quality Java applications.
- * Collaborate with team members to design and implement software solutions.
- * Troubleshoot and debug issues to improve software performance and reliability.
- * Work on web services development using SOAP and RESTful APIs framework.
- * Utilize software development tools such as IDEs (Eclipse, IntelliJ IDEA) and version control systems (GitHub).

Full Stack Developer

at MT Pixels

March 2024 – May 2024

Karachi, Sindh

- **Contribute in the admin panel for Engro Corp.**

- **Responsibilities:**

- * Developed full stack applications using Angular and Java Spring Boot for seamless integration.
- * Created RESTful APIs with Java Spring Boot to add key features.
- * Managed data with MySQL for reliable storage.
- * Secured applications using JWT for authentication.
- * Engaged in continuous learning and development.

Education

BS Computer Science

University of Sindh (GPA: 3.7 / 4.00)

01-Jan-2020 - 12-Dec-2023

Jamshoro, Sindh

Projects

SyncBox - Smart Contact Management System [GitHub]

- Developed a smart contact management system using Spring Boot MVC with a responsive frontend built in Tailwind CSS and Flowbite.
- Utilized MySQL for robust contact data management and integrated Cloudinary for seamless contact image storage.
- Implemented secure user profile management, allowing users to update and manage their personal details.
- Enabled export of contacts in Excel format for easy data backup and sharing.

Technologies: Spring Boot, MVC, MySQL, Tailwind CSS, Flowbite, Cloudinary.

SS Email Sender Application [Backend] [Frontend]

- Developed an application for composing, sending, and managing emails using Angular and Java Spring Boot with SMTP integration.
- Enabled file attachments and support for multi CC/TO recipients with dynamic field management via a '+1' button.
- Integrated `ngx-toastr` for real-time notifications, providing immediate feedback on email delivery status.
- Implemented secure backend services, including attachment processing, validation, and error management.

Technologies: Java, Spring Boot, SMTP, Angular, HTML, CSS, TypeScript, Tailwind CSS.

Cricket Pulse – Live Cricket Scoring Application [Backend] [Frontend]

- Developed a live cricket score tracking system with real-time match updates using Java Spring Boot and Angular.
- Utilized MySQL for managing match details, including team data, player statistics, and live scores.
- Built a dynamic, responsive interface using Angular's standalone components, with integrated real-time alerts via `ngx-toastr`.
- Enhanced website performance by implementing server-side rendering (SSR) and prerendering in Angular.

Technologies: Java, Spring Boot, MySQL, Angular, HTML, CSS, TypeScript, Tailwind CSS.

Integrated Learning And Job Portal – Final Year Project [Backend] [Frontend]

- Build an integrated platform offering courses, lectures, quizzes, assignments, and lab tasks alongside a job portal for students and companies.
- Implemented distinct panels for students, mentors, and companies to support personalized experiences and streamlined interactions.
- Enabled field selection during registration to foster mentor collaboration and enrich the learning process.
- Included admin controls for efficient management of courses, users, and companies.

Technologies: Spring Boot, MySQL, Angular, HTML, CSS, TypeScript, Bootstrap, Angular Material.

Code Genius Blog in Java Servlet and Hibernate [GitHub]

- Developed a Java-based web application for creating and sharing tech-related posts.
- Implemented features such as user login, post categorization, image uploading, profile editing, and a like system.
- Designed a responsive frontend using Bootstrap.
- Utilized Java Servlets and Hibernate for robust backend data handling.

Technologies: Java Servlets & JSP, MySQL, Hibernate, HTML, CSS, JavaScript, Bootstrap.

Soft Skills

- | | |
|-----------------------------------|-------------------------------------|
| • Effective Problem-Solving | • Team Collaboration |
| • Analytical Thinking | • Leadership and Mentorship |
| • Strong Interpersonal Abilities | • Critical and Strategic Thinking |
| • Clear and Concise Communication | • Attention to Detail and Precision |
